Assistance of "What-Are-We-Here For" Flanagan, Ben Butterworth, and Hanna's Private Secretary-Are the Lambites to Be Recognized?

WASHINGTON, D. C., October 9 .-(Special.)-The question is frequently asked here, "What is Colonel John S. Mosby going to get?" This interrogatory refers, in Washington parlance, to an office. Nobody seems to be able to anawer the question satisfactorily, but according to the best information at hand. it seems that the gallant Confederate officer and friend of the late General Grant is not going to get anything. Some months ago it was stated here that he was to get the consul-generalship at Habana, but Mosby is quoted as saying that he "would not be official executioner of Fitz. Lee," and, of course, if that office was offered to him, he must have declined it, but there is no evidence to that effect.

The President has been frequently accused of acting in bad faith with officeseekers. It is said that he has promised places to numerous applicants and then appointed others to these offices, I have the most reliable authority for stating that Colonel Mosby is one of the victims of Mr. McKinley's unfulfilled promises. The statement is made that the President promised Colonel Mosby the mission to Guatemala, and that the latter was perfectly satisfied he would get that appointment, and, of course, did not give himself any further trouble about it. To the Colonel's surprise, however, and that of those who were in the secret, Dr. Hunter, the defeated candidate for Senator in Kentucky, was the recipient of the plum

Nothing has been heard from Colonel Mosby in regard to the matter, and whether the failure to give him the Guatemalan mission disposes of his chances for a foreign office or not is not known. The Colonel has no relations with the present Virginia officedispensing machin

CONGRESSIONAL GOOD TURN.

Congressman Lamb came here to-day, and, as usual, did another good turn for a constituent. Mr. W. C. Tyler, of Richmond, a clerk in the Interior De-partment, had been suspended, on charges filed against him by Edward Richardson, of Georgia, who was dis-charged from the same department charged from the same department some four months ago. It appears that Mr. Tyler and Richardson had had a quarrel while the latter was still in office. Richardson vowed that he would get even with Tyler, and recently he aled charges accusing him of making apparts decognitive, in and disrepancing emarks derogatory to and disrespectful of Union soldiers some sixteen months Upon these malicious and vinda charges Mr. Tyler was suspended. Captain Lamb, however, saw the Secre-tary of the Interior and had the order suspending Tyler countermanded, and he was restored to his position until an investigation can be had. This will take place next week, and it is safe to pre-dict that Mr. Tyler will be exonerated as it is a clear case of vindictive per-

It is all as clear as day now. It is the Ohio election. The revelation comes through a promin-negro politician from Georgia, who i been here some time, living on White-House promises. C. settled what promised to be an ugly family fight in the Republican party in The defeated candidate, Captain J. A. Ramsey, was a member of the Legislature, and voted for Pritchard, with the understanding, it is alleged, that would be appointed postmaster Salisbury. Opposition to the appointment developed to such an extent that the matter was referred by Senator Pritchard to a committee of prominent Republicans. The committee unanimously recommended the appointment of J. H. Ramsey. Senator Pritchard approved the action of the committee, and the appointment to-day was the result. Captain J. A. Ramsey returns home to night in a state of violent mutiny against the Pritchard faction, and threatens dis-

M'CAULL'S CAMPAIGN. Colonel Pat. McCaull, the Lynchburg Republican nominee for Governor of Virginia, is here, and in great feather, tonight. He will open his campaign at Louisa Courthouse on Monday, and he proposes to attend the Lynchburg fair and ask for a division of time with Sena-tor Daniel and Major Tyler. Among the speakers Pat has enilated in his cause are Webb Fianagan, of Texas, who is well known as the author of the expres-"What are we here for?" when he

wanted an office. Ben. Butterworth, Commissioner Patents, will also speak in McCaull's behalf at Lynchburg, as Ben's father was a farmer in Campbell county. And last, but not least, Mr. Sidney A. Perkins, the private secretary of Mark Hanna, who is now in charge of political headquarters here, has promised to make several speeches for McCaull during the canvass. This latter would seem to be a semi-official endorsement of McCauli's candidacy and the Lamb faction in Virginia, but perhaps Mr. Perkins has only tendered his services from purely personal friendship for McCaull.

BEET-SUGAR CULTURE.

At the Department of Agriculture I ascertained from a report that the cost of growing an acre of sugar beets desends on so many varying factors as render it impossible to give an estimate which is reliable for every locality. The differences in rent of land, cost of labor. methods of culture, etc., require that any estimate which may be given should be revised for almost every series of con-ditions. The following estimate of maximum cost per acre is based on the sup-position that land is worth \$75 per acre. labor 21 per day, the yield 15 tons per acre, and that the distance to the fac-ory is not greater than three miles:

for planting ... 5 00
Fertilizing ... 10 00

reasonable application of fertilizers. It is probable that the actual cost to our farmers for the first few years of the beet industry will not exceed \$45 or \$30 per acre, and in many instances will fall below these figures. The price paid for the beets is dependent on many local considerations, but chiefly on the selling

price of sugar and the richness of the It is reasonably certain, accidents of season aside, that a net profit of from 38 to \$15 per acre may be expected from the proper culture of the sugar beet in localities near a factory, when all the conditions of the best method of culture

In contrast with the above estimate. the actual figures submitted by Mr. J. Thomssen, of Hall county, Neb., in a letter published in the Prairie Farmer, on the 3d of January, 1891, are given. The cost is given for a field of five acres, and he items are as follows: Fall ploughing, at \$1 per acre.\$ 5 90

Ploughing in spring, at \$1.25...... Rolling twice, once before and once after planting ...
Planting by hand, at 75c. per acre.
Cultivating with hoe, at 75c.

Thinning, at \$19..... Hoeing by hand three times and eeding necessary at times of

remaining weeds Dividing this by 5 gives a total of \$34.30

per acre.

As will be seen from the above, Mr. Thomssen makes no allowance for the rent of the land, used no fertilizers, and gives no estimate of the price of seed, and of the expense of harvesting and benefits to the factory. But his field we hauling to the factory. But his field was noed by hand three times, which, with the proper implements, is more than is ssary, one good hand hoeing being,

AUSTIN, TEX., October 9.-Governor Culberson to-night received a telegram from State Health-Officer Swearingen, who is at Houston, stating that he is just in receipt of a telegram from Acting-Mayor Skinner, of Galveston, stating that United States Expert Guiteras had disgnosed a case of yellow-fever there this evening. Dr. Swearingen adds that he is going to Galveston at once.

DOCTORS DIFFER. GALVESTON, TEX., October 9.-Dr. West, a member of the Galveston Board of Health, and the nominal head of the board during the sickness of the City Health Physician, Dr. Fisher, to-night made the following announcement:

"Dr. Guiteras has reported to Surgeon-General Wyman that there are eight positive cases of yellow-fever in Galveston. We (the local physicians of Galveston) held an informal meeting Saturday night to discuss matters. Some of the physicians do not agree with Dr. Guiteras, and they thought we should not submit to his opinion. Others agreed with him. Some of the physicians did not feel that the facts justified the opinion that the cases are yellow-fever."

Dr. Guiteras would not give out his report Saturday night, but, through Dr. West, it was learned that Dr. Guiteras thought the disease would not be widespread or of a virulent character.

Dr. C. W. Truehart, who has been through yellow-fever epidemics, says: "I have examined two of the cases which Dr. Guiteras considered suspicious, and I saw not the slightest trace of yellow-fever. The rupture with the French Ambassador was because Mr. Taylor protested against being omitted from the list of guests at a reception given by the Ambassador.

LABOR TROUBLE. There is no indication of an improve-ment in the engineering strike. Seventy thousand men are now idle. There is al-most a certainty of a general strike throughout the ship-building establish-

throughout the ship-building establishments, involving another 20,000 men. The strike has already entatled the loss of \$3,750,000, and the amount is calculated to reach \$10,000,000 by Christmas.

The railroad employees threaten to add to the chaos. They are to hold a great conference at Birmingham in a few days, and will formulate demands which the companies say it is impossible for them to grant, and in the event of the latter's refusal, a general strike of 150,000 railrefusal, a general strike of 150,000 rail-road workers, which will probably mean the idling of 1,500,000 others, will follow. PRESS SUPPORT OF STRIKE.

The Liberal newspapers, headed by the Daily Chronicle, and the Westminster Gazette, are advocating war to the death, and have opened subscription lists, urging a levy upon all unions in support of the striking engineers, and to purising trade-

unionism, whose very existence, they say,

In the mean while, the entire naval programme is disjointed. warships is at a standatill, and several others which ought to have been launched during the post week are still on the stocks, and saust remain there for an indefinite period.

HENRY GEORGE STATEMENT.

Object of Combination With Citizens' Union.

NEW YORK, October 9 .- After a meeting of the Campaign Committee selected by Henry George had been compluded at the Union-Square Hotel, after 11 o'clock to-night, a statement explaining the comthe service of the expedition. As Lagos bination of the George ticket in New York county with that of the Citizens' Union was made public. It says:

SOCIALIST CONVENTION AT HAMBURG.

Its Proceedings Much Discussed-Tariff Retaliation Against This Country-Other German Notes.

BERLIN, October 9 .- In spite of semiofficial denials, the relations between the Imperial Chancellor (Hohenlohe) and Emperor William are very strained. The bill for reform and unification of the military, penal code is still hanging fire, in spite of the Chancellor's deciaration in the Reichstag in 1895 that he would stand or fall with that measure, and the Emperor's strong objection to publicity in the case of military trials is much urged.

The Volks Zeitung says that the Chancellor this week offered to resign for the fourth time, and that the chancellorship crisis is now in an acute state. The Cologne Gazette corroborates this. The Frankfurter Zeltung asserts that his Majesty has been trying for months to find a suitable successor to Chancellor Hohenlone, and that one will probably be chosen from among the princes of the reigning

Prince Bismarck has repeatedly been appealed to to express himself on the subject of the government's naval plans, but the only opinion which he has vouch-safed is the statement which he made on October 4th in the course of an interview with a representative of the Schiesische Zeitung, that he approved the strength-ening of the navy by an increase in the

SOCIALIST CONVENTION.

Hamburg was a most important gathering. There were over 200 delegates present, and they represented 2,250,000 votes. The proceedings have been widely criticised, and the Conservative press claims that now the Socialists are more strictly within their legal rights they have be ome much more dangerous. The Hamburger Nachrichten, in an edi-

torial article, urges the adoption of vio-lent measures to suppress Socialism. 15 advocates the abrogation of the general franchise at Reichstag elections as being the best means of curtailing the principal influence of the Socialists.
On the other hand, the Liberal press claims that the convention has shown the Socialists to be rapidly becoming purely

a radical reform party. TARIFF RETALIATION.

The agrarian newspapers continue to demand vigorous measures of retaliation against the United States on account of the passage of the Dingley bill, but the majority of the press is silent on the

The decrease in the exports of sugar for the quarter just ended is even larger than was feared when the United States tariff went into effect. The exports from Hamburg have dropped from \$5,352,566 in 1896, to \$879,560, almost all of it being sugar from the consular districts of Stettin, including Dantzic and Koenigeberg. The figures for the last quarter were \$275,654, a decrease from \$644,405-nearly, all sugar.

WILHELM I. AGAINST DURLLING In the military writings of Emperor William I., issued by order of the present Emperor, there are many indications that the old Emperor severely conder duelling in the army.

A special session of the Evangelical

Consistory of the province of East Prussia has passed an almost unanimous vote of rebuke against the Emperor because he has broken the Sur by hunting in the forest of Rominten. Princess Frederick Leopold, of Prussia,

Emperor William's sister, recently met with a severe accident while wheeling near Potsdam. BISMARCK LIKES THE BIKE. Prince Bismarck, it appears, is now an enthusiastic admirer of the bicycle. He

approves of women riding, and regrets that he is too old and stiff for the sport Recently Prince Bismarck began to amuse himself in the evenings by card-playing. His favorite game is "skat," for

quarter-pfennig points. DISHONESTY OF MANUFACTURERS. Representatives in Germany of American manufactures and the United States consuls in the country have noticed lately a great deal of dishonesty on the part of German manufacturers, especially part of German manufacturers, especially at Chemnitz, Frankfort, and in the Rhine districts. Consul Monaghan, at Chem-nitz, has just sent a report to Washington, giving the facts and names not only in regard to imitating United States goods, and patent infringements, but also regarding incorrect invoices. Mr. Parker, a patent lawyer of Chicago, has begun suit in the German courts against a num-ber of the worst offenders. Robert Grimshaw, representing a number of American iron and machine concerns, joins in the

complaints. The favorite method of these dishonest German manufacturers and dealers is to obtain first, by contract, the exclusive representation of valuable American machines, and then to secure specimens of these machines. Next, they abandon all effort to sell any of them, but instead they imitate them closely, and place ma-chines on the market at two thirds of the American prices. Some of these manufacturers have even had the bold-ness to enter the counterfeited articles, and even the American articles themenamelled over, at exhibitions here
